## Update from HACT on COVID-19

### Dear HACT Friends and Supporters

In these unexpected and unprecedented times, I would like to take this opportunity to update you on HACT's response to the **COVID-19** pandemic.

Firstly, I would like to reassure all our supporters, beneficiaries and partners that HACT is taking proactive steps in our response to **COVID-19** to promote the health and safety of all our staff, volunteers and of course, our beneficiaries who are amongst those most vulnerable and at risk within our communities.

## Frequently Asked Questions HIV & COVID-19

The situation with the coronavirus pandemic (**COVID-19**) is escalating and changing on a daily basis. It's a very worrying time and a cause of

What people living with HIV need to know about HIV and COVID-19

great anxiety and concern – but there is much we can do to reduce the risk to ourselves and others.

Below is some practical advice and guidance specifically for those who are HIV positive and may be immune compromised.

**Q: What is COVID-19?**

A: COVID-19 is a new type of coronavirus. Coronaviruses are a family of viruses that cause diseases in animals and sometimes in humans. COVID-19 causes a respiratory (lung) infection.

**Q: If I am HIV Positive am I more at risk of getting COVID-19?**

A: It's not the case that all people with HIV are considered at increased risk.
